

Joint Conference of AMS and HKMS
Special Session "Representation Theory"

Organizers: Jing-Song Huang and Jian-Shu Li

On December 14 (Thursday)

Unitarity and theta correspondence over \mathbf{R}

Hongyu He

George State University

Time: 11:15am - 12:00noon

Waldspurger's involution and types

David Manderscheid

University of Iowa

Time: 12:00noon - 12:45pm

Lunch Break

Clifford-Fischer matrices and representations of group extensions

Jamshid Moori

University of Natal

Time: 2:00pm - 2:45pm

Annihilators of generalised Verma modules of scalar type

Toshio Oshima

University of Tokyo

Time: 2:45pm - 3:30pm

Tea Break

Degenerate principal series and theta correspondence

Eng Chye Tan

National University of Singapore

Time: 3:45pm - 4:30pm

Poisson pairs over polarized associative algebras

Xiaoping Xu

HKUST

Time: 4:30pm - 5:15pm

Almost split sequences for comodules

William Chin

DePaul University

Time: 5:15pm - 6:00pm

On December 15 (Friday)

Superposition of zeros of automorphic L-function

Yangbo Ye

University of Iowa

Time: 11:15am - 12:00noon

Transfer of unitary representations between real forms (after N. Wallach)

Chengbo Zhu

National University of Singapore

Time: 12:00noon - 12:45pm
