

The renovation project for department research facilities (postgraduate student office and visiting research scholar office) had completed. Prof XC Tai, Head of Department, expressed that the project enhanced the research space, by partitioning a new discussion room inside the postgraduate student office. The expansion of research space aims to cultivating a pleasant atmosphere for both students and their supervisors, so as to inspire their research ideas throughout their four years study life at Department of Mathematics.

Dr LS Hou, PhD graduate 2020, appreciated the new design that it would further enhanced student's sense of belonging and collaboration among research groups.

Postgraduate Student Office – left wing

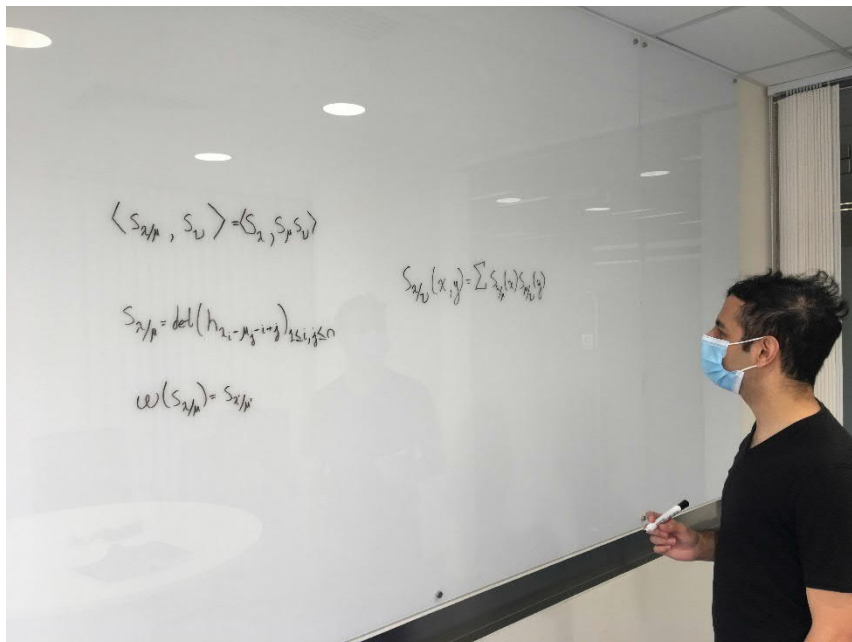

Postgraduate Student Office - right wing

Group discussion room – Good for six

Deep thinking!

Research student, Faculty and Staff come and share.

Graduate Dr Hou appreciates the new design office

Visiting Research Scholar Room
