*K N Bajaj Chair Professor,  
Department of Electrical Engineering,  
Indian Institute of Technology Bombay  
HKBU IoC Visiting Fellow  
IEEE Fellow*

Date: 17 April 2018 (Tuesday)

Time: 4:30 - 5:30 pm (Preceded by Reception at 4:00 pm)

Venue: SCT 909, Science Tower,  
Ho Sin Hang Campus, Hong Kong Baptist University

### Abstract

Despite being regarded as having a very long history of education and scholarship, India has always struggled to provide universal access to education - more so, at the higher education level. Since the independence, the Government has been working very hard in providing quality education to all. However, the challenges are too many - the sheer number of students, the cost of providing education, societal structure, remoteness of places, certain disconnect with the industry, etc. Nonetheless skilling of its citizen is a must for a country in today's world. In this talk, we plan to discuss various aspects of challenges that India faces and where we must find appropriate solutions.
